

**important**

note your personal combinations here

**1**

Set the tumblers to the pre-set factory combination. This is generally all zeroes, though this can differ depending on the brand of your lock.

**2**

Push down on side of shackle **[1]** and keep depressed.

**3**

Set numbered wheels **[2]** to desired code. There will be some rotary resistance at this stage.

**4**

Release shackle button. The number is now set.
