TSA integrated (built-in) combination lock instructions

TSA locks are delivered without a key.
Only TSA authorities have this.

reset button

TSA locks are recognizable
when this logo is present

The keylock has been designed to comply with TSA regulations, and can be safely opened by use of a special key issued to TSA authorized personnel only.

Please check the proper operation of your TSA approved lock prior to changing the factory preset combination by making sure that the opening slide can freely travel only when the dials are set to “0-0-0”. To change to your own 3-digit combination, enter the current combination (0-0-0 for initial use) and follow the instructions below.

- 1**
Put the dials at its original factory preset numbers 0-0-0.
- 2**
Press down the reset button **[a]** with a tool until you hear the “click” sound.
- 3**
Set your combination by turning the dials **[b]**, for example 8-8-8.
- 4**
Push the button **[c]** towards to the direction of arrow **[→]** and the reset button **[a]** will be back when you hear the “Click” sound. Now you have finished to set your personal combination. Please remember your personal combination by heart. To change to another combination, enter the current combination and repeat steps 2 ,3 and 4.

WARNING : If the keylock cylinder is opened, please pay attention to lock it again by turning it to the red dot position by the direction of the arrow (Any tool which can be inserted in the cylinder is OK)
